

Wichita TMC Support- Monthly Incident Report for December 2013

There were a total of **144** actively logged incidents during the normal TMC staffed hours of 6am to 7pm. **58** incidents occurred along the **US-54** corridor, **23** occurred along **K-96**, **35** along **I-135**, **27** along **I-235**, and the remaining **1** on **K-42**. Any congestion incidents that were logged by the MIST system without additional operator information were excluded from the analysis. Below is a breakdown of active incident type as well as average duration of incident by type.

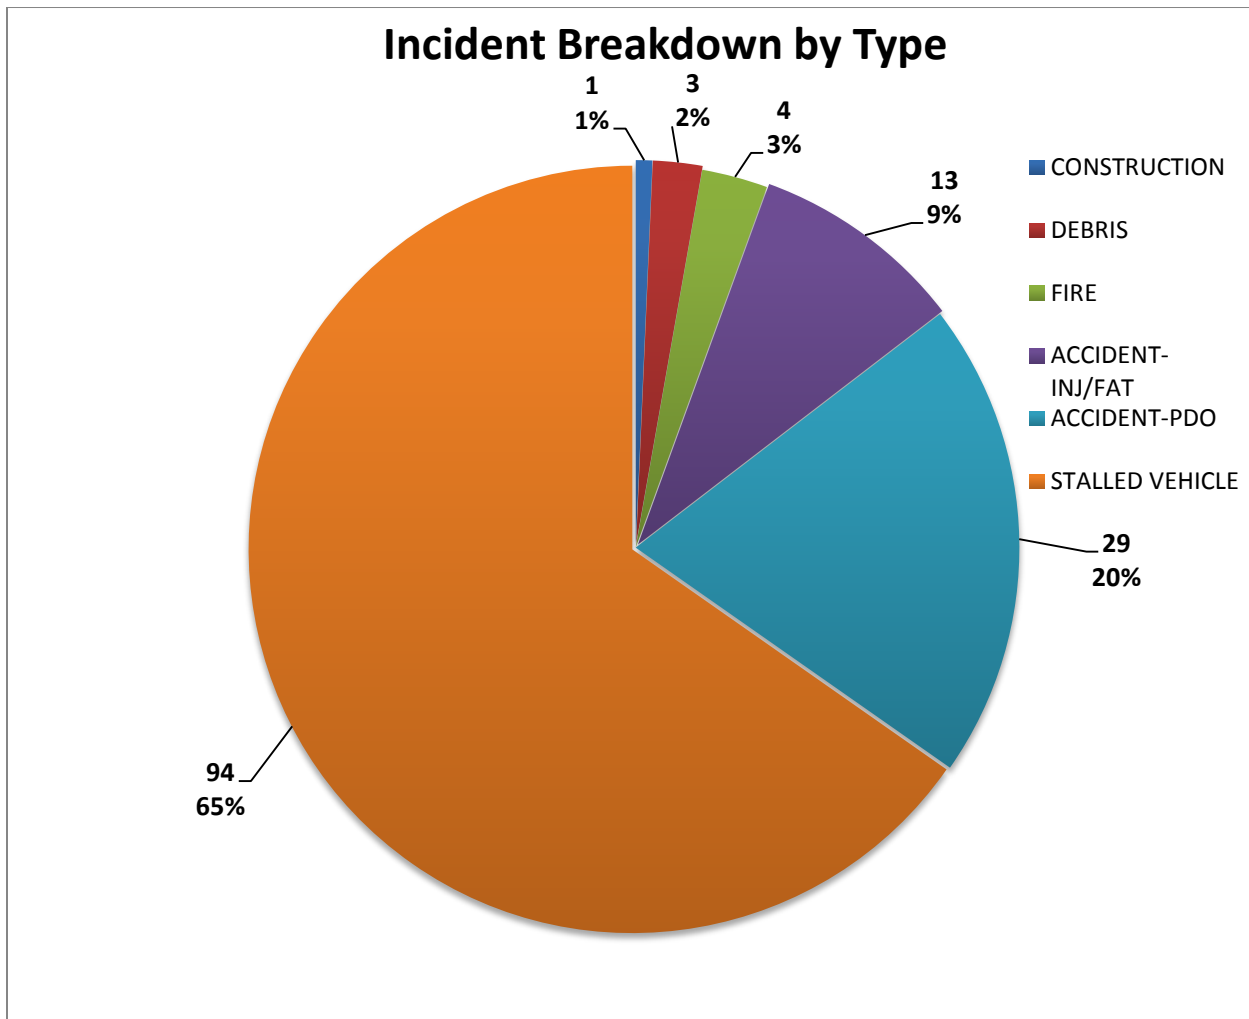

Figure 1: Number and percentage of actively logged incidents in MIST for the month of December broken out by type of incident.

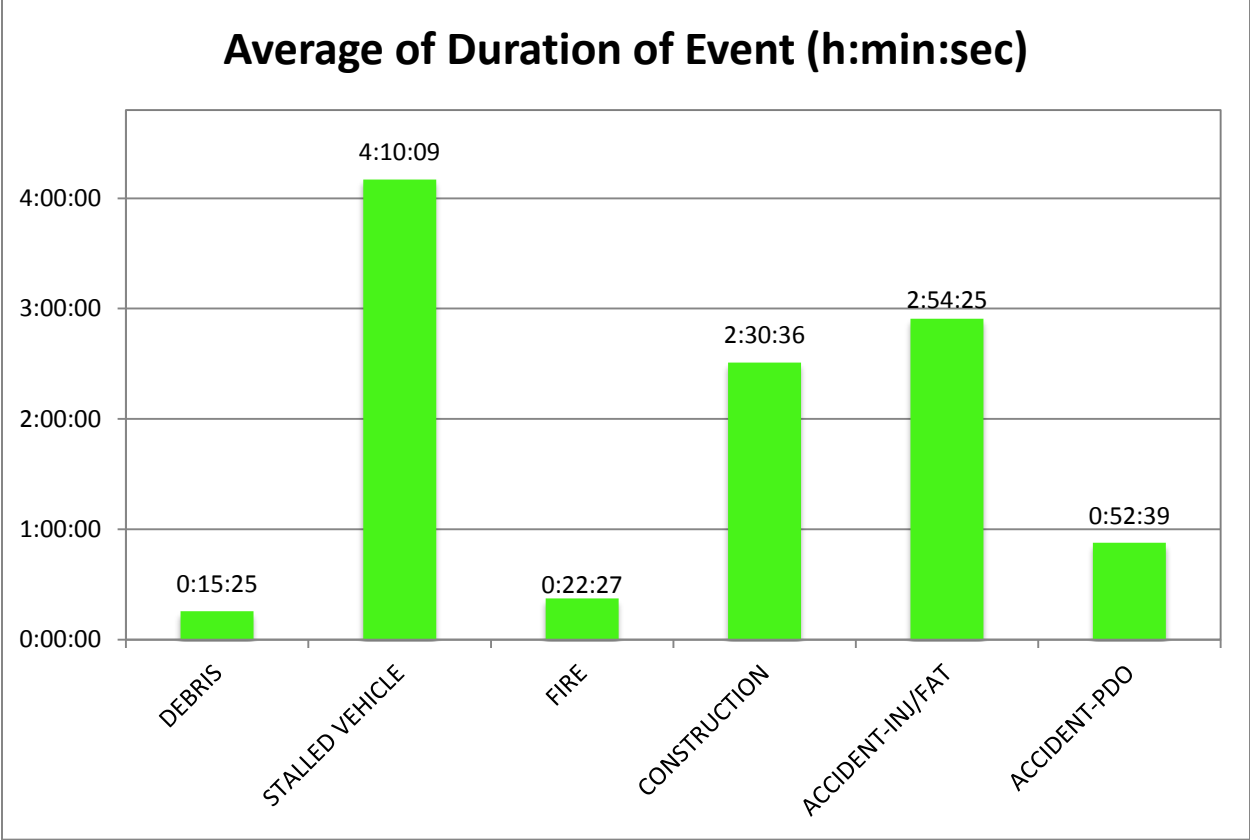

Figure 2: Average Duration of Incident by type for the month of December

These same incidents were also roughly plotted by incident location as shown in the map below:
