

Wichita TMC Support- Monthly Incident Report for September 2013

There were a total of **147** actively logged incidents, with **65** incidents along the **US-54** corridor, **24** occurred along **K-96**, **49** along **I-135** and the remaining **9** on **I-235**. Any congestion incidents that were logged by the MIST system without additional operator information were excluded from the analysis. Below is a breakdown of active incident type as well as average duration of incident by type.

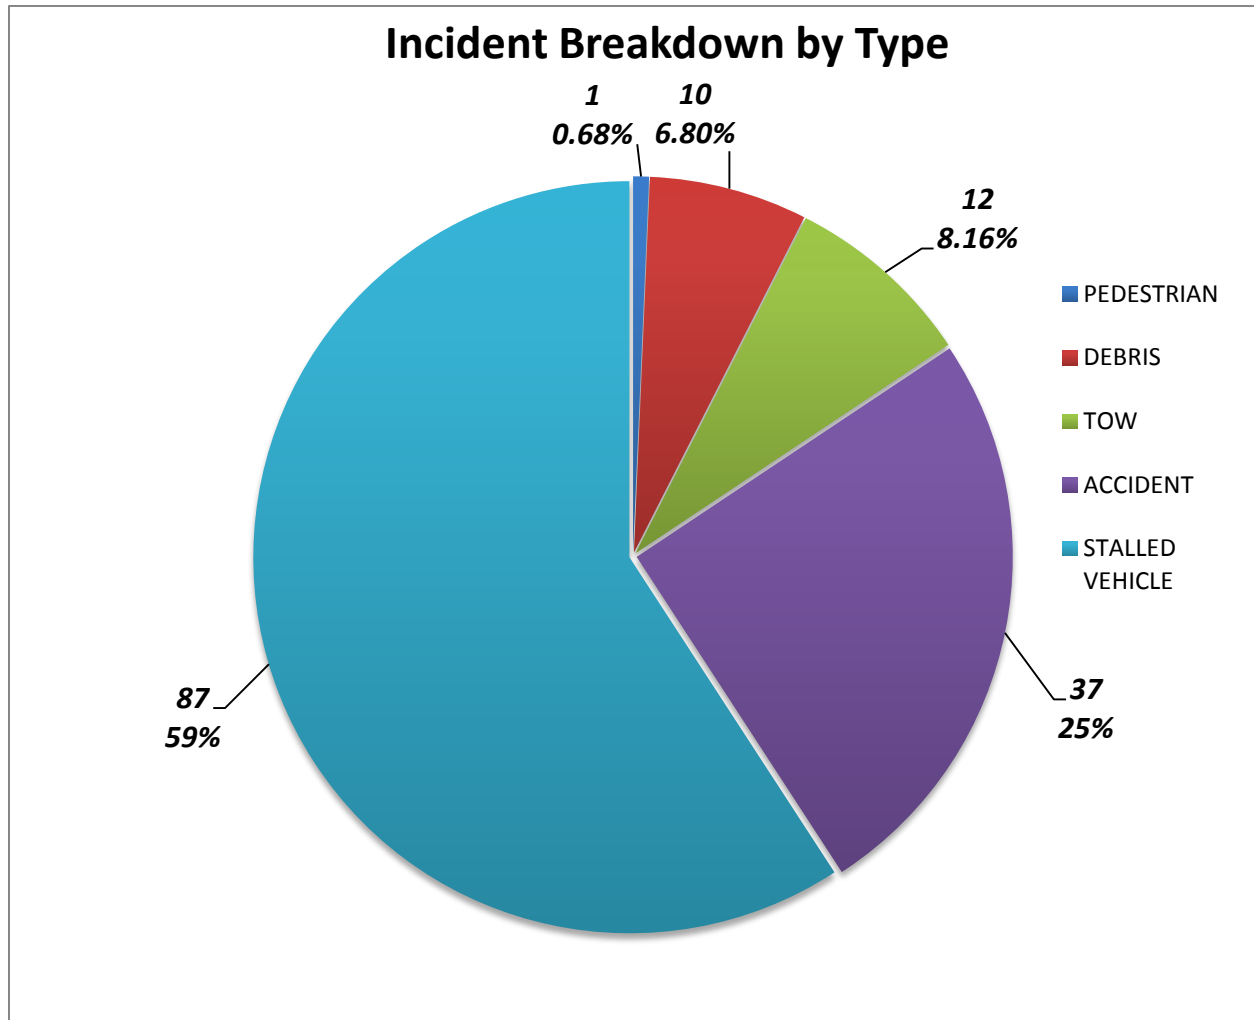

Figure 1: Number and percentage of actively logged incidents in MIST for the month of September broken out by type of incident.

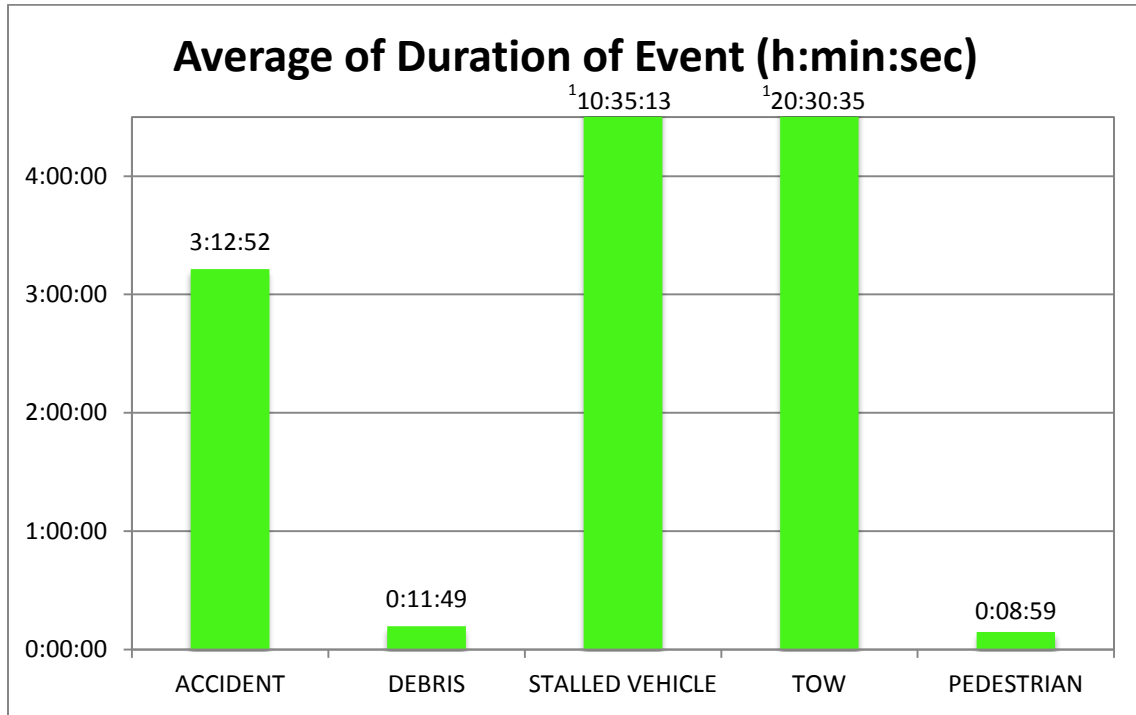

Figure 2: Average Duration of Incident by type for the month of September

¹ Average event durations include incidents that were entered prior to the weekend and then terminated the following Monday during regular TMC operational hours. Vehicles may or may not have been located on the highway throughout the weekend.
