There were a total of 189 actively logged incidents during the normal TMC staffed hours of 6am to 7pm. 76 incidents occurred along the US-54 corridor, 26 occurred along K-96, 57 along I-135, and 30 along I-235. Any congestion incidents that were logged by the MIST system without additional operator information were excluded from the analysis. Below is a breakdown of active incident type as well as average duration of incident by type.

**Figure 1: Number and percentage of actively logged incidents in MIST for the month of April broken out by type of incident.**

**Crashes by Severity**

- **Severity Levels**
  - Minor - duration under 30 min.
  - Intermediate - duration of 30 min. to 2 hrs.
  - Major – duration greater than 2 hrs.
